

# AMAZING ANIMALS IN THE WORLD

## AARDVARK

It is also known as an anteater.  
It has a very long nose to sniff out termites  
and its tongue is more than 40 cm long.

# AYE-AYE

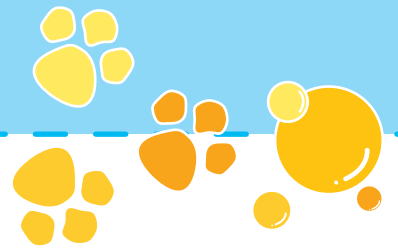

It eats wood-boring larvae and its middle finger has a long claw in order to chisel the insect out.

# ARMADILLO

It has a heavy body armour and it can eat up to 100 kg of insects a year.

# MANATEE

It looks like a walrus and it's also known as "the sea-cow".

# MEERKAT

It stands upright in the early morning sun to warm up, sniffing the wind and looking around.

# TARSIER

It has the largest eyes in the mammal world and this is a great feature for hunting at night and judging jumping distances between trees.

# HAMMERHEAD SHARK

One of the sea's most awesome predators.

It hunts fish, sharks and shellfish.

Its hammershaped head helps to spread its electromagnetic receptors, eyes and nostrils over a larger area.
